

AI Security Copilot Assessment Report

Generated: 2026-06-13 21:33:44 IST

Executive Summary

The assessment reviewed 2 host(s) and identified 3 vulnerability finding(s).

Findings

IP Address	Port	Product	Version	CVE	CVSS	Risk Factor
192.168.1.10	22	OpenSSH	9.6p1	CVE-2024-0683	9.8	Critical
192.168.1.10	80	Apache httpd	2.4.58	CVE-2024-11234	8.5	High
192.168.1.20	443	nginx	1.24.0	CVE-2024-62598	6.5	Medium

Risk Ratings

Critical: 1

High: 1

Medium: 1

Low: 0

Recommendations

- Upgrade OpenSSH to a patched version, restrict SSH access to trusted networks, and review authentication logs.
- Upgrade Apache httpd to a patched version, review enabled modules, and limit public access where possible.
- Upgrade nginx to a patched version, review the server configuration, and monitor web server logs.

Conclusion

Prioritize Critical and High findings, apply available security updates, and validate remediation with a follow-up scan.
